DISCOVER

THE LIFE SCIENCES INDUSTRY

This annual event is tailored for master's and PhD students, young professionals and academic researchers aspiring to make their mark in the life sciences. Whether you're a professional seeking insights from industry leaders, a student with a passion for science, or an academic looking to transition into this dynamic sector, the Biopôle Discovery Day provides a platform for all. Engage with like-minded individuals, glean wisdom from inspirational entrepreneurs, and connect with industry experts who are shaping the future of life sciences. Join us for the 2026 edition:

- Explore StartLab, the life sciences incubator nurturing innovative start-ups.
- Connect with seasoned entrepreneurs, gaining valuable insights and networking opportunities.
- Engage with former academics who've transitioned into impactful roles on the Biopôle campus, discovering diverse career paths.
- Explore the journeys of individuals who completed a Master's, PhD or postdoctoral fellowship, or who redirected their careers afterwards, and discover how these experiences positively shaped their professional paths.

Find the updated programme details on our website: biopole.ch/events.

Seating is limited, so be sure to secure your spot, starting from January 29, 2026.

DISCOVER BIOPÔLE

Based in Lausanne, Biopôle is one of the largest life sciences campuses in Europe. It offers state-of-the-art facilities to over 160 companies, from start-ups to multinationals. These benefit from pioneering spaces, such as ready-to-go laboratories StartLab and Superlab, as well as a Digital Health Hub. It's also home to five major research institutes: CHUV, Ludwig, Swiss Data Science Center, University of Lausanne and Unisanté.

Biopôle's vibrant community includes over 3,500 people, who collaborate extensively. This convergence of talent and expertise facilitates the development of cutting-edge innovations in pharma, medtech, biotech and digital health, among other sectors.

Biopôle SA, which owns, manages and promotes the life sciences campus, also supports the community: it provides financial help through its Investment Programme, business strategy support via Vanguard Accelerator and an abundance of networking opportunities.
