

WEB SYMPOSIUM

Early Identification of Sepsis

Serial point-of-care measurements of
Pancreatic Stone Protein in the critically ill

17th November 2020

4:00 - 5:00 PM CET | 10:00 - 11:00 AM ET

Join us for this free, online symposium to learn how the biomarker Pancreatic Stone Protein (PSP) enables the early identification of sepsis in the critically ill. Discover novel data demonstrating the clinical benefit of serial bedside PSP measurements.

Welcoming words

Sepsis: the silent killer burdening hospitals across the globe

*Professor Dr Steven Opal,
Alpert Medical School of Brown University, USA*

Early identification of sepsis through serial bedside PSP measurements

*Dr Bruno François,
Centre Hospitalier Universitaire de Limoges, France*

Real life implementation of PSP testing in the clinical setting

*Dr Angelo Giacomucci
Unità di Terapia Intensiva, Azienda Ospedaliera di Perugia, Italy*

PSP as a septic biomarker: a meta-analysis

*Dr Philippe Eggimann,
Centre Hospitalier Universitaire Vaudois, Switzerland*
